#### Posterior Predictive Check

Model-predicted lines should resemble observed data line

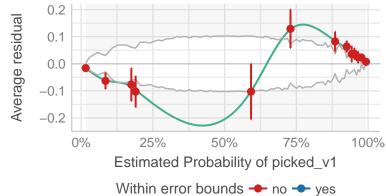

el-predicted data — Observed data — Observed data — N

0.4

Leverage (hii)

### Binned Residuals

Points should be within error bounds

## Collinearity

High collinearity (VIF) may inflate parameter uncertainty

## Normality of Residuals Dots should fall along the line

Influential Observations

Std. Residuals

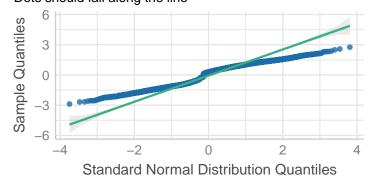

3

-3

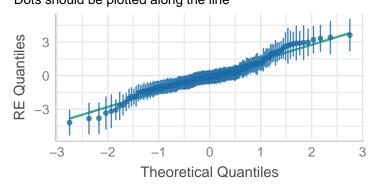

0.0

Points should be inside the contour lines

0.2

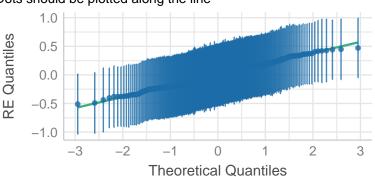

## Normality of Random Effects (part\_id) Dots should be plotted along the line

# Normality of Random Effects (base)

Dots should be plotted along the line

Low (< 5)
