reg_rate * variation + baseline_p * reg_dist * variation

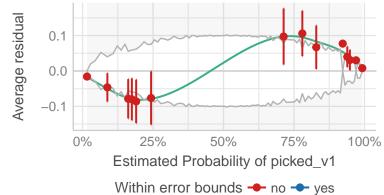

Posterior Predictive Check

Model-predicted lines should resemble observed data line

Binned Residuals

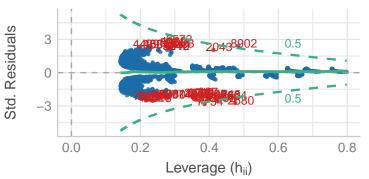

Points should be within error bounds

del-predicted data — Observed data — Observed data —

Influential Observations

Points should be inside the contour lines

Collinearity

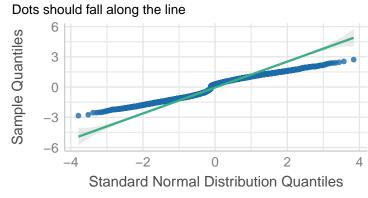

High collinearity (VIF) may inflate parameter uncertainty

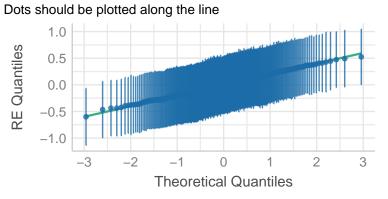

Low (< 5)
 Moderate (< 10)
</p>

Normality of Residuals

Normality of Random Effects (base)

Normality of Random Effects (ba

Normality of Random Effects (part_id)

Dots should be plotted along the line
